

How can Maestro support your journey to value-based care?

Like many organizations, you may have found that **transitioning from fee-for-service to value-based care (VBC)** is somewhat challenging. Or, you may not have even begun the journey. Whether you're a newcomer or have been involved in the process for some time, **Maestro™ is designed to help support you on your journey to value.**

Maestro can support your management of VBC capabilities through a **population health services organization (PHSO)**. The right collaboration can help you build a PHSO aimed at **helping advance financial and clinical performance** across your populations.

Implementing an insights-driven, collaborative VBC strategy can support you in:

- Discovering the right **value-based contracts** and **performance opportunities**
- **Enhancing care delivery** with a comprehensive, **patient-centered care team** approach
- Creating **sustainable operations** to support **long-term success**

How can you benefit from a PHSO collaboration with Maestro?

A PHSO can help your organization with:

An effective PHSO has collaborative operations to help support connected care across the continuum:

A PHSO is aimed at helping health systems improve patient outcomes across the continuum by aligning the financial, clinical and operational capabilities necessary to deliver value-based care. Through our technology-enabled operational services, *Maestro* is designed to help strengthen the provider-patient relationship to focus on enhancing health across populations.

Many CEOs ... predicted that they would be much further along in adopting value-based payment models than they are today. They admit now that progress was much slower because efforts are much harder than they had anticipated.
